Facsimile (530) 426-1120

Water System Update

June 10, 2017

Dear SLCWD Customer:

During the months of February and March the District's ability to produce treated drinking water from Lake Serena was significantly restricted due to the cold water temperature (~1° Celsius) that resulted from the formation of ice around the intake pipe. With the breakup of the ice, the water temperature has increased to approximately 3° and the treatment process is operating as expected at typical pumping rates.

The District is investigating possible changes to the treatment plant and/or processes to reduce cold water impacts in future years.

If you have any questions or concerns, please contact the office at 530-426-7800.

Sincerely,

Bill Quesnel PE
General Manager
